

Alpha Transform

+ DocFusion:

Build Once. Generate Anywhere.

Empower your field and office teams with a unified platform for mobile data capture and compliant document automation, from first input to final signature.

Seamless integration. Smarter workflows. Faster outcomes.

The combined power of Alpha Transform with DocFusion delivers an end-to-end solution that digitises, automates, and governs every stage of your business process, wherever work happens.

1. Mobile & field form capture – Powered by Alpha Transform

- Rapidly deploy custom mobile and offline-ready data-capture apps.
- Simplify complex field workflows with no-code/low-code tools.
- Ensure data accuracy and compliance from the point of entry.

Metric: Reduce form creation time by up to 70% and eliminate paper-based processes.

2. Automated, governed document generation – Powered by DocFusion

- Transform captured data into professional, compliant documents instantly.
- Enforce governance, templates, and version control across the enterprise.
- Generate Word, PDF, or HTML outputs with centralised rules and branding.

Metric: Cut document generation and review cycles by 50–80%.

3. End-to-End flow to compliant signing (Optional: SigniFlow Integration)

- Seamless routing of generated documents to e-signature.
- Audit trails, security, and compliance built in.
- A fully digital, fully governed document lifecycle.

Metric: Accelerate contract turnaround and approval times by up to 5x.
