

**DOCFUSION<sup>®</sup>**

## **DOCFUSION FOR SIGNIFLOW**

**INTELLIGENT AUTOMATION TURNS DOCUMENTS  
INTO LEGAL TRANSACTIONS**

**SIGNIFLOW<sup>®</sup>**

**DOCFUSION - GENERATES ACCURATE, DATA-DRIVEN DOCUMENTS**  
**SIGNIFLOW - DOCUMENTS ARE SECURELY SIGNED AND APPROVED**

Together, DocFusion and SigniFlow create seamless digital workflows automating document generation, approval, and legal electronic or digital signatures

The result is faster transactions, reduced operational risk, and compliant digital document processes from creation to signature

### **THE CHALLENGE**

Organisations spend more time preparing documents than completing the transaction

Many implement digital signatures but still struggle with manual preparation before it can be signed

### **THE SOLUTION**

DocFusion generates documents using trusted data from enterprise systems

SigniFlow manages the secure signing and approval process

Together they provide fully automated document lifecycles that improve efficiency, governance, and customer experience

Turn automated documents into legally signed,  
compliant transactions

# GENERATE AND SIGN DOCUMENTS IN MINUTES INSTEAD OF DAYS

## HOW IT WORKS

### 1. GENERATE

DocFusion generates dynamic documents using approved templates and trusted data sources

### 2. ROUTE

Documents are automatically routed through internal workflows or directly to customers or partners for signature

### 3. SIGN

SigniFlow enables secure electronic or digital signatures with strong authentication and full compliance

### 4. STORE

Signed documents are stored with full audit trails and can be integrated back into systems or repositories

## KEY BENEFITS

- Faster transactions
- Generate and sign documents in minutes
- Reduced operational risk
- Documents are generated from approved templates
- Stronger compliance
- Maintain audit trails and enforce governance
- Seamless integration
- Connect to CRM, ERP, and core platforms
- Better customer experience
- Review and sign documents digitally
- Scalable automation
- Handle large volumes without increasing complexity

# DELIVER A COMPLETE DOCUMENT AUTOMATION FRAMEWORK

## USE CASES

DocFusion and SigniFlow support a wide range of document-driven business processes, including:

- Customer onboarding
- Contracts and agreements
